📍 Bogota Colombia

## EDUCATION

### Ingenieria de Sistemas

UPTC

2014

### Tecnico Sena

Sena

2018

## SKILLS

- AI gpt API Backend
- Angular
- React
- Mongo
- SQL
- Wordpress
- Github(ci/cd)
- GCP

## WORK EXPERIENCE

Tech Lead and Software Arquitecture

2022 - 2024

### Study Now I Canada

Solutions in Angular, React and WordPress: I used modern technologies such as Angular and React for the development of robust and scalable web applications. Additionally, I implemented and customized WordPress-based solutions to meet various business needs.

Process Automation (RPA) in Python: Developed robotic process automation (RPA) solutions using Python, optimizing repetitive tasks and improving team productivity.

Deployment in GCP, AWS and Render: Performed application deployments in multiple cloud environments, including Google Cloud Platform (GCP), Amazon Web Services (AWS) and Render, ensuring high availability, scalability and performance.

Test Automation

### Globant

2021 - 2022

Development of Automated Test Scripts:

Write and maintain automated testing scripts using tools such as Selenium, Cypress, JUnit, TestNG, etc.

Create user interface (UI) tests, regression tests, functional and non-functional tests.

Integration of Tests in the CI/CD Process:

Integrate automated tests into the Continuous Integration/Continuous Delivery (CI/CD) pipeline using tools such as Jenkins, GitLab CI, CircleCI, etc.

- Ensure that tests run automatically on every build and deployment.
